Summary

Full Stack Developer with 6+ months of hands-on experience in developing and maintaining scalable web applications using Java, React.js, Node.js, Spring Boot, and MongoDB. Skilled in frontend and backend development, REST API integration, and database management. Seeking a Software Developer or Full Stack Developer role to enhance technical and problem-solving skills in a growth-oriented organization.

Experience

Arshith Fresh India Pvt Ltd

Software Developer

Bangalore, India

Apr 2026 – Present

- Designed, developed, and maintained a production-level e-commerce website using HTML5, CSS3, JavaScript, and Shopify.
- Implemented product listings, promotional banners, and seasonal campaigns aligned with business goals.
- Built interactive UI components including sliders, dropdowns, product filters, and animated sections.
- Integrated JavaScript-based form validations and dynamic user interactions to improve user experience.
- Maintained clean and version-controlled codebases using Git and collaborated with teams for timely releases.

Inventeron Technologies And Business Solutions

Software Engineer

Bangalore, India

Dec 2025 – March 2026

- Completed structured technical training focused on JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Worked on frontend development, backend API creation, REST API integration, and database management.
- Developed healthcare web modules using React.js, Node.js, Express.js, and MongoDB.
- Implemented online slot booking and appointment scheduling functionality.
- Built APIs for contact, enquiry, and appointment management.
- Integrated WhatsApp and Google Maps features with responsive frontend design.

Projects

Wire Fencing Management System | Java, Spring Boot, MySQL, React

2023

- Developed a web-based system to manage stock, sales, and purchase operations.
- Implemented real-time inventory tracking and reporting features.
- Designed backend APIs and integrated frontend for seamless data flow.

City-wise Crime Rate Prediction | React.js, Supabase, Python

2024

- Developed a full-stack web application to analyze and predict city-wise cybercrime trends.
- Built machine learning models using Python for crime forecasting and risk analysis.
- Created interactive dashboards using React.js for visualization and insights.

Farmonic – Agriculture E-commerce Platform | JavaScript, React.js, Node.js, MongoDB

2025

- Developed a full-stack agriculture-based e-commerce platform similar to Flipkart for farmers and sellers.
- Implemented product listing, cart, authentication, and order management features.
- Built RESTful APIs using Node.js for product and user operations.
- Used MongoDB for managing product, user, and order data.
- Designed a responsive frontend using React.js to ensure smooth user experience.

Technical Skills

Languages: Java, JavaScript, HTML5, CSS3

Frontend: React.js

Backend: Spring Boot, Node.js, Express.js

Databases: MySQL, MongoDB, PostgreSQL

Web Technologies: REST APIs

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Core Concepts: Data Structures Algorithms, OOPS, Full-Stack Development

Education

JAIN (Deemed-to-be University)

Master of Computer Applications (AI & ML) — CGPA: 8.09

Bangalore, India

2024 – 2026

JSS Shri Manjunatheshwara Institute of UG and PG Studies

Bachelor of Science in Computer Science — CGPA: 7.11

Dharwad, India

2020 – 2023

Certificates & Publication

Certified Java Full Stack Developer – JSpiders Institute

Published research paper titled “Farmonic: A Decision-Driven AI-Integrated Agricultural E-Commerce Ecosystem” focusing on AI-based crop disease detection, recommendation systems, and smart agricultural commerce.
